Hi Michael,

Thanks for getting back to me with an update about the next steps for the Allied Landfill process. It sounds like a good plan to proceed with the April 30 Public Meeting focused on the EPA, DEQ and City process (showing the work group's work); and then have Skeo attend and facilitate discussions at a follow up public availability session focused solely on the reuse considerations for the city's concept.

As we discussed yesterday, we are looking forward to receiving the CH2MHill remedial alternative map for the city's concept (sounds like that may be available in the next week). We will build our analysis based on that map for use in the 2nd public availability session. The interim reuse suitability assessment presentation that we shared in February is attached for reference (as an ms powerpoint file).

Did you determine whether you would like someone from Skeo to attend the 4/30 meeting? I as I mentioned, I will be on travel that day and am unable to attend.

Thank you.
